Analysis of cause behind profit

Most expensive: Kolkata Pune Hyderabad Delhi
Most profit earned: Kolkata Mumbai Chennai
Least profitable: Delhi Surat

Reasons:

Kolkata is the costliest as well as the most profitable. The no. of orders in a day and the rating of cleanliness is highest as well for it which justifies the profit and rush. However the delivery time seems to also be the most in Kolkata which should be a negative factor, however it seems to not affect overall profit.

Mumbai has the opposite case, it has a high rating and high number of orders which justifies the profit and also has less delivery time which also aligns with the cause.

Surat and Delhi tell us an interesting case, Surat has a low rating and low business and so does delhi, but the food is way more expensive in delhi than Surat and as for profit Delhi and Surat both are lacking behind, hence Delhi suffers greater losses.
